**Subject:** RE: 2021 SH Projects for B&V

All,

When reviewing your project, please review the B&V proposal from last year for any removal / remote grid option.

Please note that we are looking to harden the zone in the HFRA, not in the non-HFTD.

Thanks,

**Subject:** 2021 SH Projects for B&V

B&V Team,

I updated our spreadsheet to include new 2021 projects that I would like to start immediately (this has the highest priority). We'll use the same guidelines we've been using the past, but will need three proposals instead of 2.

- a. Blend of OH and UG
- b. All Overhead
- c. All Underground

To ensure that we submit similar format, I attached the update key sketch template, device template, and worksheet description for your use.

Create **Project Scope (Key Sketch) & Worksheet Description** (must provide 3 proposals)

- a. Key Sketch needs to include the maps below. (Naming Convention: "2021 08W - Circuit - CPZ - Project Scope")
  - i. Overview Map
  - ii. Fire Tier Zone Map
  - iii. Satellite Map
  - iv. Key Sketch
- b. Work Sheet Description (Naming Convention: "2021 08W - Circuit - CPZ - Worksheet Description")

*If you are considering remote grid, please chat with me and we can discuss further.*

Below are the assigned CPZ that you'll work on:

Status	Short Text	Year	Project
--------	------------	------	---------

			<b>Type</b>
1. PM Not Created	SH - Upper Lake 1101 CB	2021	SH
1. PM Not Created	SH - Keswick 1101 LR 1586	2021	SH
1. PM Not Created	SH - Middletown 1102 LR 302610	2021	SH
1. PM Not Created	SH - Konocti 1102 LR 965078	2021	SH
0. PG&E Responsibility to Design	SH - Mariposa 2102 LR 241564	2021	SH
1. PM Not Created	SH - Bucks Creek 1101 CB	2021	SH
1. PM Not Created	SH - Middletown 1103 LR 830	2021	SH

Let's aim to have these routed by **December 2<sup>nd</sup>, 2020** (except for Middletown 1103 LR 830 – we can discuss further once you're done with your current project).

Thanks,
