Recent Desktop Scoping Sessions

Team,

In the effort to meet the challenge of having 200 miles into estimating hands by January 31, 2021, there has been much discussion regarding NOT field scoping after the desktop scoping session, but simply segmenting the maps and confirming in the field when the estimate actually starts. I believe this is the method your LOB agreed upon.

Harsh, can you confirm this and provide the necessary direction to this team so we can get the following projects that have already had a desktop scoping session pushed forward? There is approximately 42 miles that have been through a desktop scoping session already.
