Subject: RE: Please Advise : Scoping meetings this week + Mileage

Hi Team,

Our SMEs already provided us with their reviews and they are very brief as this was a straightforward project from a bio/cultural/efs standpoint. We will be able to provide the same type of review for this TULUCAY 1101 project as we have done with all others.

Thanks!

Subject: RE: Please Advise : Scoping meetings this week + Mileage

This project was added to Friday as the last project. See the meeting invite comments below

***Adding 1 more project

[REDACTED]	TULUCAY 1101 RECOND WITH TREE WIRE	2020-88272	NB	
------------	------------------------------------	----------------------------	----	--

***Adding 2 more projects – KMZ files for many projects with older routings have been uploaded into SAP. Once EDRS are approved they can no longer accept new document uploads.

[REDACTED]	CWSP-COLUMBIA HILL 1101-TS8233-PH1.1	2018-72909	SI	4
[REDACTED]	RECONDUCTOR DIAMOND SPRINGS 1105	2018-38234	SI	4

Please plan to attend this scoping session for projects in YO/ST & DI listed below. Scoping Session procedures will remain the same. The only exception is that we will request that each task be prioritized and expedited in order to get these projects into the hands of the estimators so dependencies can start to be cleared and then into construction as soon as we possibly can.

The projects for this meeting are listed below. The AA are not all approved as we are attempting to crash the schedule to get these projects started. KMZ files are also attached as well as other scoping documents to the AA link in EDRS. If there are any specific questions or concerns, please let me know.

Please forward to anybody I may have missed.

Hey [REDACTED]

We found one that isn't in the meeting invite and that hasn't been reviewed at this time:

1/8/2020	[REDACTED]	TULUCAY 1101 RECOND WITH TREE WIRE	2020-88272	
----------	------------	------------------------------------	----------------------------	--

I just wanted to let you know in case others don't have this project as well. We might not be able to provide you a KMZ file for this project, but I will be able to provide you with a high level environmental constraint.

Please let me know if you have any questions.

Thanks!

Here is my up to date list of projects within the new risk model totaling 137.92. The dates on the left are the dates the scoping session will take place or already took place. I have more on my radar but it has not been scheduled as of yet, potentially another 20 miles. I am also being told that I might receive another 30 miles today, we will see.

Subject: Please Advise : Scoping meetings this week + Mileage

Hey [REDACTED]

During this scoping meeting yesterday I heard you say that we had about 94 miles to review this week. After going through the meeting invites and projects associated with those invites there are only 86.91 miles. Can you please confirm that we have all the projects we need for review? It looks like the mileage for [REDACTED] might be off by 20 miles which might be the discrepancy....
