Hi [REDACTED]

During the meeting you instructed us to hold off on N. Dublin until it was field checked.

I heard the final outcome of Potter Valley to be OH harden in place.

Please clarify you want us to proceed with N Dublin and Potter Valley base maps.

Thank you for this coordination! Let's talk offline [REDACTED] said the DSDD makes everything more complicated now. 🙄

NO, I believe Estimating still prefers it because of all the detailed information required on the DSDD. Specific Pole locations, Heights, etc. You may want to converse with [REDACTED] to determine what is specifically needed for DSDD so we can prepare for it as well.

Thank You,

[REDACTED]

OH hardening in CT R/W does not require a base map. Would you like me to remove the two projects below from the base map list?

[REDACTED]

OK, Go ahead and get started on Base Maps. Here are a few that do not have UG (unless something changes) but are within CALTRANS ROW.

Let me answer this question tomorrow. We have our first Wildfire Governance Committee meeting today to discuss finalized scopes on a few projects. I would like to see how it goes and get a comfortable feeling that the scope we proposed remains relatively the same.

Thank You,

[REDACTED]

Thank you. This makes it much easier.

Do you approve starting base maps for all of these projects, including Middletown 1101?

Subject: SH Scoping meetings this week

Good morning [REDACTED]

I am compiling a list of all the projects scoped this week that require base maps for city/county encroachment permits and UG in CT R/W. Land Department would like to get a jump start on creating the base maps, even though the routes may not be finalized and approved.

Please assist in pointing out which projects you would like Land Dept to start creating base maps this week to ensure a complete list and help reduce lead times.

Thank you!
