I know it is difficult but they are projected that far out with attempting to clear the constraints in 2021. If we do not clear the constraints then we may not even hit the target of 2022+

Thank You,

Chris,

I see verbiage from [REDACTED] in the EDRS about 2022 or 2022+ timeframe... Should we be prioritizing these approved projects that will be built in 2021? I do realize we need to start on some of these to meet the 2022 timeframe, but being where we are for our 2021 target, I want to ensure the estimating resources are on the right work at the right time.. Thoughts?
