Attachments: Bucks Creek.png

Hey [REDACTED]

Please see attached. Can you confirm the scope for this one? Is the blue proposed UG along Hwy 70 and the green OH hardened in place?

Thanks,

[REDACTED], PLS | Senior Land Surveyor
Pacific Gas & Electric Co. | Land Survey – North Valley

Hi [REDACTED]

If it goes as scoped, 90% of the project would be converted to underground along Hwy 70, opposite side of the river. We would need it to be surveyed for this work as well as for the CalTrans permit. The section in the clip you provided over the RR tracks would likely remain overhead and hardened in place. Please reach out to [REDACTED], he is the project manager and can speak to whether or not this project has been approved to move forward and in what scope. Thanks.

Hey [REDACTED]

See attached. I'd like to confirm the survey mapping scope for this one, if I should ask someone else please let me know.

This image is from the scoping [REDACTED] I have, is this entire +/- 4 mile route proposed UG and needs survey?

The green appears to be mid-slope (above the highway) and crosses the UPRR tracks, is this accurate and are we planning to bore beneath the tracks?

Thanks,

[REDACTED] PLS | Senior Land Surveyor
