Looks good, go ahead and update the EDRS routings.

Per our conversation earlier tonight, I made the recommended changes and updated the sharedrive and uploaded everything to all three EDRS links.

Everything for all three should be good to go, and remember I only did one EASOP & WFRG by combining the info for LR 48212 Ph 1 and Ph 2.

Thanks,

I also got this one complete last night but I guarantee we need to talk about it. The “all UG” alternative has about 2000 feet of OH in it, so I got creative with how to account for that. But basically, I created two Hybrid alternatives by creating a 2nd tab for the inputs and for the risks. Anyway, it’s probably easier to talk about over the phone, but I know you’re busy so no rush.

Thanks,

Update: [Wildfire Hardening Template v2](#) – Team we need to update our templates to the new format in the link provided. I tried to update some, but I couldn't. We need to discuss the required changes quickly so that we can get these inform slides ready for the committee by 10AM Tuesday 2-2-21.
