Subject: RE: Projects needs scoping documents uploaded to EDRS - Update 2/4/21 PM

[REDACTED]

Preferred Egress/Ingress for UG is due to the project being near HWY 41 and the narrow rural roads. Due to minimal tree strike, the PSS team was okay with Hardening in place. I can change all to satisfactory, but UG is basically always their preferred choice. See the PSS egress/ingress response below:

- The western portion of the project lies near CA-SR41, which is a main route of travel for residents in the event of evacuation depending on a fire's location. CA-SR41 is also one of the main arteries accessing Yosemite Nat'l. Park. The east and northern portion of the project incorporates narrower rural roads and minimal options for egress depending on a fires location and should be considered a high priority.
- These roads are also critical to first responders to make access to the fire to engage in firefighting operations.

I can add in more risk costs with the Cal Trans Easement and new easements to follow existing dirt/gravel roads off the main arteries.

Thanks,

[REDACTED]

Coarsegold 2104 shows UG and hybrid preferred for Egress/Ingress, but according to the decision tree says no Egress/Ingress risk? If UG is preferred for that risk, then hybrid is within 100% of the NPV. Why wouldn't we choose that?

[REDACTED]

Coarsegold completed. Oakhurst needs updated drawings from the DE. Key Sketch still shows UGing from breaker to road instead of riser outside of the sub.

Thanks,

Patrick

Subject: Projects needs scoping documents uploaded to EDRS - Update 2/4/21 PM

There are 5 jobs ready for you to review (Middletown LR 48212 was merged into one EASOP/WFRG). When you get around to checking them out, please review them in the sharedrive links provided (not EDRS). Once you are good with everything, we will ensure EDRS is up to date.

Thanks,
