Attachments: PCA PM Alignment +PRJ1 (2021 YTD January Actuals)v1.xlsx

Team,

Wanted to resend a copy of the file from yesterday as one of the pivots did not refresh as expected. ([REDACTED] thanks for pointing out the issue!)

The PM cost summary table was not footing with the data coming from PRJ002 and causing a variance between the two sheets. I've since corrected the issue and a updated file has been attached.

Apologies for any inconvenience and let me know if you have any further questions.

Regards,
[REDACTED]

Team,

Please do not forward this file to direct reports as it has projected changes and notes that I would prefer not to be shared at the moment.

Please note that this report is simply a supplement used to assist in PM/PCA alignment changes, monitor monthly variances, etc.

Respectfully,

[REDACTED], [PMP](#) | Manager, MP&P Project Governance & Controls

Office: [REDACTED]

Morning [REDACTED]

I believe this is the file that you were referencing but let me know if that is not the case. The file is currently capturing up to YTD January 2021 actuals + forecasts and was refreshed this morning.

Let me know if you need anything else.

Regards,

[REDACTED]

[REDACTED]

Can we get that pivot table you put together for us that had the portfolio spend by PM? We are evaluating some staffing discussions due to both System Hardening as well as the Transmission work coming in and we need to make sure our overall portfolios are somewhat level.

Thanks,

[REDACTED]

Hi [REDACTED]

Would you like each supervisor approach this individually or is it something you could provide [REDACTED] a combined view for?

Thanks,

[REDACTED], MScEng, PMP

Thanks [REDACTED], I am looking for the dollar value per PM for the entire team in your verticals.

Sincerely,

[REDACTED] PMP, SCPM
Director, Portfolio & Project management
Pacific Gas and Electric Co.

Hi [REDACTED],

I added a column to show average portfolio per PM currently (before hiring). I have 60 miles per PM and [REDACTED] has 54 miles per PM.

Division	Total System Hardening Miles	Total OH Miles	Total UG Miles	PM Supervisor	# of Currently Available PMs
HB/NB/SO	119	52	53	[REDACTED]	2
NV/SI	163	124	35	[REDACTED]	3
SA/ST	44	38	6	[REDACTED]	2

Didn't mean to confuse anyone with the term "system hardening PM". It really is the number of PMs available to take on the hardening jobs regardless.

Thanks,

[REDACTED] MScEng, PMP
Supervisor, Electric Distribution Project Management - EB/DI/NB/SO/HB
Pacific Gas and Electric Company

What is the average portfolio per PM currently under each supervisor? Also why are calling out system hardening PM's vs a PM?

Sincerely,

[REDACTED] PMP, SCPM

Thank you, team! Great work! [REDACTED] please see the below summary.
I agree with the assessment needs for more PMs. Should we bring on as Contractors for now? We can discuss at one-on-one.

[REDACTED]

Based on our discussions with [REDACTED] and [REDACTED] we need 4 additional PM resources; 2 for [REDACTED]'s team supporting NV/SI work and 2 for my team supporting HB/NB/SO. This is based on our evaluation of the latest scoping status found [here](#).

To summarize what we discussed with [REDACTED] and [REDACTED]

- I have 2 available system hardening PMs and around 120 miles of total hardening work. With 2 additional resources, each PM will have an average of 30 miles in their portfolio
- [REDACTED] has 3 PMs available and 160+ miles. With 2 additional resources, each PM will have 33 miles
- [REDACTED] initially thought [REDACTED] and [REDACTED] might be able to support HB and/or NV work. However, more and more work started coming through the pipeline in SA/ST. [REDACTED] mentioned today that he doesn't need additional resources and the 44 miles mentioned below will keep [REDACTED] and [REDACTED] busy.

Division	Total System Hardening Miles	Total OH Miles	Total UG Miles	PM Supervisor	# of Currently Available System Hardening PMs
HB/NB/SO	119	52	53	[REDACTED]	2
NV/SI	163	124	35	[REDACTED]	3
SA/ST	44	38	6	[REDACTED]	2

[REDACTED], [REDACTED]: Please let me know if I missed anything we discussed.

Thank you all for your help and support with this effort!

[REDACTED], MScEng, PMP

Good call [REDACTED].

I asked [REDACTED] and [REDACTED] for that yesterday and started compiling an email. Please let us know how many folks you need. Remember that we can leverage contractors as well because this work may move in future years.

Lastly, we have some approved head count already so we may only need to get [REDACTED] buy in.

[REDACTED]
Can you pool together and provide Paul and I with a comprehensive resource plan for PMs needed to cover projects in your areas? Id like to go to Roger and above with one request.
Thanks!

Hi [REDACTED].

I already reached out to [REDACTED] this afternoon and request an additional 2 PMs to support NV and SI. As for both [REDACTED] and [REDACTED] supporting HB and NV, I wouldn't mind either of them for additional support to NV.

Thanks

Hi [REDACTED]:

I hope you had a great weekend!

I know you mentioned on Friday that you will discuss the most current resource needs for system hardening with [REDACTED] this week. Could you let me know when that happens so I can schedule a quick follow up with you guys?

Once you reach a resolution around how we will utilize [REDACTED] and [REDACTED] (HB vs NV), we can determine the need for additional resources and summarize our findings so that [REDACTED] and [REDACTED] can go to Roger with the ask accordingly.

Thanks,
