Subject: PEND ESTS Forecast/Actuals Weekly Summary
Attachments: Weekly ESTS & PEND Forecast and Actuals (2-22-21).xlsx

Greetings Team,

Please see the attached table for your review. Note the following adjustments based on today's meetings feedback.

- Removal of the Workplan year criteria
- Added column to take snapshot of the Pend in date and adjacent column will test if the original pend in date was changed. If the pend in date is greater than that original the column will be flagged and the calculation will not pick it up in the current week actuals. Will also need to recon this column each week to bring in values that were previously zero.
- Added additional logic to test the "Break Ground Date" Dependability

Take a look and let me know if you have any questions.

Regards,
