**Attachments:** 2021 System Hardening Weekly Summary (Updated 2-26-21) .xslm

[REDACTED]

This is the most up to date information. [REDACTED] and I just went through it. In short:

- We have 67 miles in ESTS that is currently planned in 2021 there are other miles but due to underground or permitting are 2022 projects
- We have 115 miles that have been scoped and approved by the committee that are moving through our process that is being updated every day.
- 189 is in scoping.

I don't have [REDACTED] data to match it thoroughly but [REDACTED] had said that the engineers over there are new and he is seeing some data errors come over and he is correcting them. However my guess is that he is including some of the 115 miles that have been approved by the committee in ESTS. We don't put it in that status until an estimator has officially been assigned.

Team,

Please find attached a copy of today's update for the WSHP summary.

Apologies for the delay in sending this out today. If you have any questions please feel free to reach out.

Thank you,

Project Controls Analyst
