Thank you [REDACTED]

[REDACTED], in order to complete our project review, we may need additional information. Please see the following:

- Required for initial project review
  - Client Input Form (CIF) Received
  - KMZ Received
  - Estimator Drawings Received
  - Scope Documents (if not described in CIF)
- Additional information listed below may be required to release ERTC document in certain circumstances. If information below not provided prior to ERTC being issued, Environmental will need to review when information becomes available.
  - Access Routes Information Not Submitted
  - Laydown Yards/ Staging Areas Information Not Submitted
  - Helicopter Zones Information Not Submitted
  - Vegetation prescription information Information Not Submitted
  - Other Work Areas Information Not Submitted

Thank you!

Hello,

Project CWSP - BUCKS CREEK 1101 CB PH 1 scope is to rebuild 461 feet of Overhead conductor, install 739 feet below ground within Hwy 70 with Level 2 system hardening construction on the BUCKS CREEK 1101 circuit as part of the Wildfire System Hardening Program. Project involves a total of 3 work locations, 2 pole replacements, 1 intercept pole which include primary distribution. Anticipated equipment to be utilized during construction includes: Line trucks, bucket trucks, pick-up truck, materials truck, crew truck and backyard machine Excavator or Backhoe. Access to pole locations will utilize existing established paved, gravel, dirt roads or overland travel. Staging area location will be determined at a later date by GC construction.

I have also included a kmz and preliminary drawing....please note that the 'underground' scope may be moved to PM [REDACTED]-CWSP - BUCKS CREEK 1101 CB PH 2.

Respectfully,

[REDACTED] PMP
