Good Morning [REDACTED]

This would probably be a better question for the estimators of the underground sections, as their estimates will include the installation of these boxes.

Good Morning [REDACTED]

Would a field meet in early May to identify the #5 box locations help with estimating?

Thank you for your time,

Hi [REDACTED]

Do you want me to set up another 'walk down' so we can spot the 5-boxes at various locations along Hwy-70 when the time comes....probably first or second week of May?

Please advise,

Hi [REDACTED]

Apologies for the delay in responding to this. Based on the past DSDD that I have worked on, after receiving the base map, I would likely need to edit the base map with the project specifications and add the proposed clearances to the construction drawing. Due to the limited amount of locations near the highway on the section I am estimating, I wouldn't anticipate those updates taking more than a day at the most for my section.

Thank you for your time,

Hi [REDACTED]

Couple things, first, per the attached email I have gained approval to reduce the 'cable size' to avoid the need for 7-boxes....please work with your assigned ADE to confirm this change. Secondly, Caltrans didn't have the level of detail we need for our basemap, so we contracted with REY, and the expected completion date is currently 5/7/2021.

How long after the basemap is completed would you need to be completed with Estimating....please keep in mind that we will need to spot the boxes along the highway via another meeting at some point after we have received the basemap from REY.

Please advise,

Hi [REDACTED]

Do you have an idea of when the Bucks Creek jobs will be scheduled for surveying for highway clearances?

Thank you for your time,
