Did you intend to send a table or do you want me to grab one from a previous agenda?

Please fill in the Table with the project information, as well as any of the PG&E staff that will be joining you.

Also, any of the Agency names if you have them.

Thanks,

[REDACTED]

We've got calls into Plumas County, the Railroad, Caltrans and the Forest.

I'll follow up this morning but as of yet I'm not aware of any responses. I'll try to have something before your meeting.

If you have confirmation from any of the Agencies, please let me know. Have a GO status call this morning at 10:30 PDT, and they like the updates.

Thanks

FYI, I don't think we'll have time for the Orofino jobs. Thursday's schedule is pretty packed. On Friday, I have to drop [REDACTED] off in Chico before I head back to Sacramento for my flight out.

Absolutely. We'll just need to be back down to Chico by 1:00 pm for the daily debrief call.

[REDACTED] are driving it tomorrow to map out a plan.
Should we wait on time change until they are done with the pretrip?

Attached is the updated System Hardening schedule for next week's site visit.

In addition to the holes that need to be filled, should we meet earlier in the morning since there will be additional travel time? I would suggest 7 am.

Thanks,

I would suggest we meet at 400 E. Park Avenue, Chico, 95928 on Friday 4/16. We can car pool from there. It should take 45 minutes to an hour to get to the site from here.

Let me know if you disagree.

[REDACTED]
Do you know what time we want to meet up with everyone on Friday? I need to let the agencies know.

Hi [REDACTED],

I looked it up, and it's now called Toni's Mix'n It Up Restaurant. Address is 11975 CA-70, Oroville, CA 95965. Do you think there will be an issue if we leave a couple of rigs parked there?

Thanks,

Last cell service and location to meet would be across from Jarbo Gap CAL Fire Station on highway 70.

The restaurant used to be called Scooters and has a large parking lot and cell service.

Once we drop below that location, we lose cell until we get down near Bucks and you have to have a booster. Each PG&E facility usually has wifi at their location also and there are three to four hydro facilities along the way depending final route.

No problem.

If we go with Bucks Creek we will need to be clear on the logistics. It's well out of cell range so I'll find a meeting location within cell range that we can all head out from together.

Hi [REDACTED]

Yes. We do want [REDACTED] team included on the April 12 visit.

Rob,

We plan to visit the 3 Bucks Creek projects

Hello All!

FYI, the following is a high level snapshot of the April Site Visit agenda. No feedback yet.

I'll let you know when they've given the go ahead.

Thanks,

Subject: Site Visit Updates

For your consideration is the proposed site visit high level overview. Please review and let me know of any changes or recommendations.

Monday, April 12th
0800 Start Time
AM and PM – System Hardening Project with Agencies

Three projects on the Bucks Creek circuit that cover 4 miles. They are high risk score on the new risk model. They have Railroad, Caltrans, Forest Service & PG&E Hydro to manage. These projects are also 90% underground which means they won't be built until 2022. The projects are south east of Paradise.

Do you want someone from Rob Cones team to be included?

Tuesday, April 13th
0900 Start Time
AM – Distribution Inspect App Observation w/ Contract Inspectors
PM – Transmission Inspect App Observation

AM – [REDACTED] Distribution, Chico)
PM – [REDACTED] (Transmission, Oroville)

Wednesday, April 14th
0700 Start Time
AM/PM – Vegetation Management

Post wildfire mitigation and EVM work in Redding, CA.

All of these projects are in the North Valley Region. Logistically, Chico looks like the best central hub for all three days.

Thanks,
