[REDACTED],

I am really struggling with the EVM charts.
I get the model adjustment – makes sense.

The buydown curve only showing the top 20% and the labeling of the axis is confusing

The “no regrets” ~ 1000 miles ask does not seem to tie to the buydown curve – no anchor point between the two pages.

You have built up a lot of credibility with the committee, don't want this to go south today. Can we chat. I am going to hold on sending out the materials till you and I align.
