Team,
Current proposed STIP and LTIP metrics and targets. Note below to [REDACTED] calls out targets may change due to GRC settlement, but target setting method should be consistent.
Also, the LTIP slides highlight the impact to SH the risk model shift has that Ahmad highlighted this morning. Slides 7 and 19.
Best

[REDACTED] PG&E

Some of the measures included in this document are contemplated as additional precautionary measures intended to further reduce the risk of future ignitions following the 2017 and 2018 wildfires.

[REDACTED]
Attached are the summaries for the 2021 STIP and LTIP metrics.
The power point decks have the level of detail needed for tomorrow's discussion, If needed I also have detailed metric templates with additional details.
Note:
The LTIP targets may shift due to the recent GRC settlement agreement. The methodology will be the same, but the volume of work may be adjusted.
This deck also shows the shift in work for SH discussed in the separate e-mail from this morning's exec session. Slides 7 and 19.

Best,
[REDACTED]
