[REDACTED]
Per our chat. I received these on 12/30 from [REDACTED], it's possible there have been some changes in the last week.

Thanks,
[REDACTED] | Director, EO Regulatory Strategy & CWSP PMO

Nothing matters more at PG&E than public, employee and contractor safety.

Some of the measures included in this email are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.

[REDACTED]
Happy New Year. Hope you had good Holidays.

I'm attaching the most recent version of the deck that [REDACTED] mentioned. Note, the 2023 System Hardening targets are not fully vetted – I'm not sure if you need these for the 2021 WMP. If you are planning on including them, please let me and we can figure out the best way to handle it.

I will keep you updated in case there are any last-minute changes to the 2021 and 2022 targets.

Thanks,
[REDACTED]

[REDACTED]
[REDACTED] mentioned today that there are powerpoint decks that go with these word docs. Can you send me the PPT decks as well?

Thanks,

[REDACTED]

Please see the metric definition documents attached. The 2021 targets are good to go. The document has the description of calculations, conditions, and exceptions.

Let me know if you have any questions,

I was not able to validate the 2023 SH targets with [REDACTED], from a funding view point in the GRC.

[REDACTED]

Will do. Before I send the details to [REDACTED] though – did you have a chance to validate the 2023 SH targets with [REDACTED]?

Thanks,

[REDACTED]

Yes I am. Let me have [REDACTED] send over the specifics.

Can you send over both the SH and EV – description and targets. For SH, Option 2, For EVM – 1800 miles.

Importance: High

[REDACTED]

Are you familiar with the details of the two effectiveness metrics, how they are calculated and what our 2021 targets are for these?

System Hardening Effectiveness

EVM Effectiveness

These two items are currently NOT called out in the 2021 WMP but it sounds like the instruction from the OPC is to make them 2021 WMP Commitments so they can be captured through EOEP in the WMP Metrics Compliance item and left out of the Safety & Operational Metrics compliance item. I'm not sure if you were in the meeting where this was discussed but is that consistent with your understanding?

Thanks,
