

**Public Safety  
Long Term Incentive Plan (LTIP)  
Target Setting**

**January 5, 2021**

### Why System Hardening and Enhanced Vegetation Management?

System Hardening (SH) and Enhanced Vegetation Management (EVM) focus on mitigation of potential wildfire risk from Distribution Overhead Assets, which have resulted in a significantly higher number of ignitions (nearly 90% of the total CPUC Reportable ignitions from 2015 – 2020 YTD)

- Distribution assets represent high ignition risk due to a combination of high exposure area (overhead assets traversing HFTDs), proximity to risk factors (vegetation), and intrinsic asset characteristics
- SH and EVM mitigation work focus on mitigating these risk factors on Distribution Assets and are key mitigation programs to continue addressing potential wildfire risk

Initiating Cause	2015 - 2020 YTD <sup>1</sup> CPUC Reportable Ignitions in HFTD		Estimated Ignitions per 1,000 Circuit Miles in HFTD <sup>2</sup>	
	Distribution	Transmission	Distribution	Transmission
Equipment – PG&E	217	30	8.5	5.4
Vegetation	305	11	11.9	2.0
All Other <sup>3</sup>	195	34	7.6	6.1

For Equipment driven ignitions, the Distribution ignitions per Mile rate is 1.6x greater than Transmission

For Vegetation driven ignitions, the Distribution rate is 6x greater than Transmission

1. YTD represents data as of the end of September, 2020  
 2. Circuit mileage in HFTD area source: 2020 wildfire safety Plan – 25,598 of distribution overhead mileage in HFTD area, 5,542 of transmission overhead mileage  
 3. Other includes ignitions primarily driven by 3<sup>rd</sup> party and animals

## Risk Model and Risk Quantification

1/1/2024

## Risk models provide risk profile curves to guide workplan

The risk profile curve shows *the amount of risk that can be addressed* with every subsequent mile within a Circuit Section or CPZ that is mitigated. This view illustrates the relative magnitude of risk associated with the top 100 CPZs and the visualization highlights the consolidation of risk by CPZ as you move down the prioritization list.

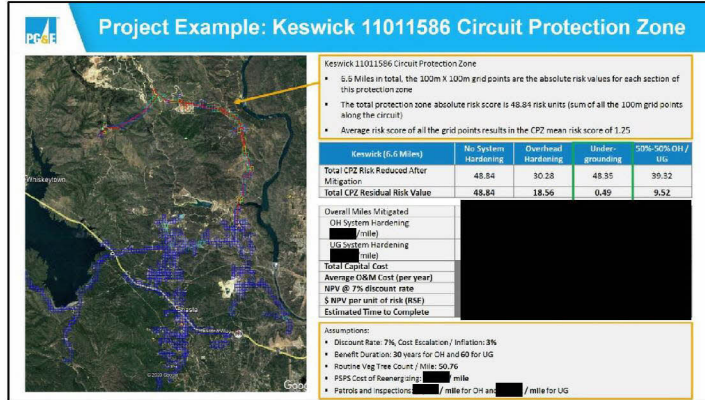

The improvement in the Risk Model results in a significant shift in the highest risk circuit protection zones

8

**Project Example**

## Target Setting

12/20/2024

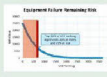

## System Hardening

### Conditions

**Condition 1: 80% of system hardening miles have to be highest-risk miles over the three-year period or LTIP is 0**

**Risk Profile (Highest Risk Miles defined as)**

1. Top 20% of risk buydown curve
2. Fire rebuild miles
3. PSPS mitigation miles

**Condition 2: Minimum percentage of miles mitigated with either Line Removal or Undergrounding over the three-year period or LTIP is 0**

**Risk Effectiveness**

- 10% of Undergrounding or Line Removal work in the System Hardening project portfolio<sup>1</sup>

**Risk Exposure**

- Count of circuit miles system hardened in the HFTD and HFRA

### System Hardening Targets (Risk Miles)

	LTIP 0.5	LTIP 1.0	LTIP 2.0
2021	180	199	208
2022	423	464	485
2023	423	464	485
<b>2021-2023</b>	<b>1,026</b>	<b>1,127</b>	<b>1,178</b>

1. Basis of the 80% is to allow for operational execution considerations including permitting, weather related access, and mob/demob efficiencies

2. Basis of the top 20% correlates to ~70% of the risk on the risk buydown curve

3. Risk reduction effectiveness for Overhead Hardening is estimated at 62% and Undergrounding or Line Removal is estimated at 90%

**System Hardening targets are set based on 2021 risk miles and program funding assumptions**

- Program Funding**
- Forecast of [redacted] and [redacted] Wildfire Mitigation capital spend in 2021 and 2022, respectively, consistent with the proposed Decision Revision for the 2020-2022 GRC. 2023 forecast escalates 2022 by 15%.
- Unit Costs**
- Assumes [redacted] per circuit miles of Overhead S11 work and [redacted] for Underground work.
- Program Duration**
- Execution of the 13-year plan focusing on top 20% circuit protection zones by 2032.

System Hardening LTIP Targets

	LTIP 0.5	LTIP 1.0	LTIP 2.0
2021	180	199	208
2022	423	464	485
2023	423	464	485
2021-2023	1,026	1,127	1,178

- Targets are miles of system hardening work for specific risk-prioritized work
- The total mileage of the proposed 2021 Project Portfolio was set as the threshold goal (LTIP 0.5) for 2021.
  - LTIP 0.5 goal in 2022 reflects escalation of program funding level; the 2023 LTIP 0.5 goal is set equal to the 2022 level based on the 2023 GRC funding level forecast.
  - The target and stretch goals (LTIP 1.0, 2.0) were set as 10% and 15% higher, respectively.

[redacted] includes scoping and engineering costs for future system hardening projects beyond 2021 and additional minor capital spend for other Wildfire Mitigation Programs

**Enhanced Vegetation Management (EVM)**

**Conditions**

**Condition 1: 80% of EVM miles have to be highest-risk miles over the three-year period or LTIP is 0**

**Risk Profile (Highest Risk Miles defined as)**

- Top 20% of risk model buydown curve
- Five impacted miles

**Risk Effectiveness**

- Execute work consistent with defined EVM scope
  - Achieve 2.2' recommended radial clearance
  - Assess shrub potential trees including high-risk species
  - Remove overhangs above and within 4 feet of power lines
  - Mitigate vegetative fuels under and adjacent to powerlines on targeted basis

**Risk Exposure**

- Count of EVM miles worked in the HFTD and HFRA

**EVM Targets (Risk Miles)**

	LTIP 0.5	LTIP 1.0	LTIP 2.0
2021	1,800	1,890	2,070
2022	1,800	1,890	2,070
2023	1,800	1,890	2,070
2021-2023	5,400	5,670	6,210

1. Basis of the 80% is to allow for operational execution considerations including permitting, weather-related access and customer approvals  
 2. Basis of the top 20% correlates to ~85% of true risk on the risk buydown curve

**EVM targets are set based on work to be completed over the remaining twelve years of the program**

**Program Duration**

- Assumes execution of the 12-year Enhanced Vegetation management Plan (2021-2032)
- Evaluating viability of 10-year pace (2021-2030)

**Program Funding**

- Forecast of [redacted] and [redacted] spend on EVM program in 2021, 2022 and 2023 respectively (in alignment with POR)

**Unit Costs**

- Assumes [redacted] per miles of EVM work.

Enhanced Vegetation Management LTP Targets

	LTP 0.5	LTP 1.0	LTP 2.0
2021	1,800	1,890	2,070
2022	1,800	1,890	2,070
2023	1,800	1,890	2,070
2021-2023	5,400	5,670	6,210

Targets are miles of EVM work for specific risk-prioritized work.

- The total mileage of the proposed 2021 Project Portfolio was set as the threshold goal (LTP 0.5) for 2021
- The target and stretch goals (LTP 1.0, 2.0) were set as 5% and 15% higher, respectively

## Governance and Oversight

### Wildfire Risk Governance Committee

- System Hardening project lists (by CPZ) consistent with the Target Setting methodology will be formally approved annually by the Chief Risk Officer
- Enhanced Vegetation Miles (by CPZ) consistent with the Target Setting methodology will also be formally approved annually by the Chief Risk Officer

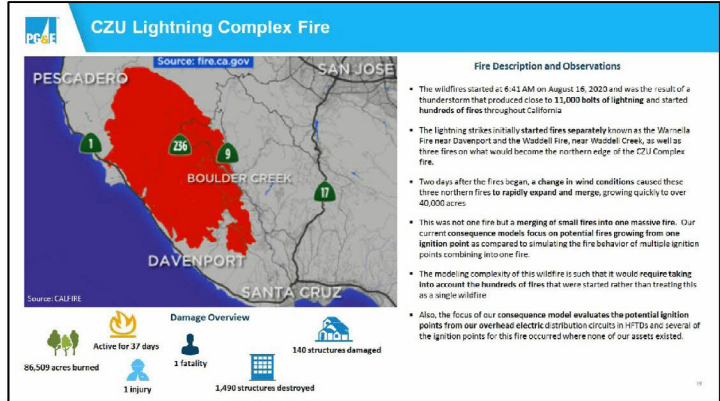

### PG&E Board – SNO and Compensation Committees

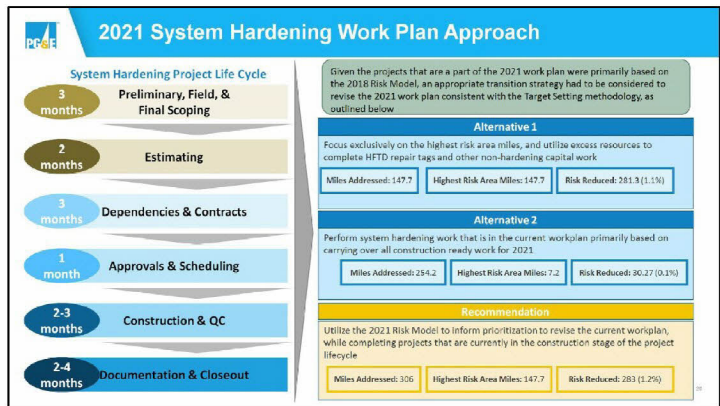

- Annual submission of a) System Hardening project list and b) specific locations of the Enhanced Vegetation Management miles to the SNO and Compensation Board Committees by the Chief Risk Officer
- Quarterly progress updates on plan vs. actual for both System Hardening and Enhanced Vegetation Management will be submitted to the SNO and Compensation Board Committees by the Chief Risk Officer

17

## Appendix

10/20/2024

**Selected list of most destructive fires in the past thirty years**

Fire Name	Cause	Date	County	Acre	Structures Damaged	Deaths	PGE/Electric Power caused
Alvord - Oldman Falls	Arson	Oct-08	Deschutes	1030	27500	25	No
Conza	Under Investigation	Oct-09	Shasta	26,000	354	3	No
Oriskany	Human Related	Oct-03	Siskiyou	272,940	2800	15	No
OKI	Human Related	Oct-03	St. Bernard/Orin	91,281	1,003	0	No
Waco	Power Outage	Oct-01	San Diego	151,000	1,400	2	No
Yuba	Electrical (Transformer)	Sept-25	Lake, Nevada, Oregon	70,000	1,900	4	No
Buick	Power Outage	Sept-22	Arizaba, California	70,000	323	2	Yes
Chaparral	Arson	Aug-04	Yuba	1,919	400	0	No
Lawton	Firearm	Jan-27	Maricopa	81,000	133	0	No
Yuba	Electrical (Transformer)	Oct-17	Nevada and Oregon	20,000	1500	12	No
Delta	Power Outage	Oct-17	Arizona	24,000	1,200	3	Yes
Delta	Power Outage	Oct-17	Nevada, Oregon	32,000	180	0	Yes
Redwood Valley	Power Outage	Oct-17	California	46,000	140	0	No
Coosaw (Four Wind Campsites)	Power Outage	Oct-17	Yuba	5,000	204	4	Yes
McMurtrei	Power Outage	Oct-17	Yuba	4,000	100	0	Yes
Elmore	Power Outage	Oct-17	Nevada, Nevada, Oregon	29,000	1,000	2	No
Car	Human Related	Jul-18	Shasta County, Trinity	275,000	1,600	8	No
Complex	Power Outage	Nov-16	Yuba	110,000	1,000	0	Yes
Washburn	Under Investigation	Nov-18	Vernon	96,000	1,600	3	No
Washburn	Power Outage	Oct-19	Arizona	27,000	170	0	Yes
Board Fire	Human Related	Nov-19	Yuba	2,500	0	0	No
Aught Complex	Under Investigation	Aug-22	Maricopa, Humboldt, Trinity, Sierra, Oregon, Lake, California	1,000,000	900	2	No
Four Complex	Under Investigation	Aug-22	Butte, Plumas, Yuba	1,000,000	2,000	15	No
1400 Lightning Complex	Under Investigation	Aug-22	Lake, Yuba, Siskiyou, Trinity, Oregon	300,000	1,400	0	No
1700 Lightning Complex	Under Investigation	Aug-22	Butte, Plumas, Siskiyou	80,000	1,400	1	No
1800 Lightning Complex	Under Investigation	Aug-22	Siskiyou, Plumas, Siskiyou	200,000	1,200	0	No
Chase Fire	Under Investigation	Sept-30	Butte, Oregon	47,000	1,000	0	No
Creek Fire	Under Investigation	Sept-20	Francis, Medina	177,000	800	0	No

\*All fires listed are destructive unless indicated to the contrary  
 \*\*Fire caused by PGE/Electric power
