Hey [REDACTED]

Attached are the project template and relevant data sources:

1. **Risk Buy down Curve:** Add the CPZ in to cell B2 on “sheet 1” to populate the chart
2. **PSPS Chart:** Type the circuit in cell D2 and sort column B largest to smallest to update the chart
3. **Veg Model:** Included this for the strike potential trees (wasn’t sure if you had it already). Strike potential trees are in column E.

Let me know if you have any questions,
[REDACTED]
