Thanks for the feedback Jeff. Regarding your requested updates:

- I can certainly make the change to have Bucks Creek as an inform, but I believe Volta is already an inform.
- For the mileage breakout / bucks creek risk calc, Brad can you update these from the EASOP to make sure we've got the right data.

Best,
[REDACTED]

Sorry, another comment: Doesn't look like the risk calculation is correct on the Bucks Creek (is the existing Risk 9.55? The OH option before and after does add to 9.55):

Bucks Creek 1101 (4.73 miles)	No System Hardening	Overh
Project Scope Risk Reduced After Mitigation	-	
Project Scope Residual Risk Value	9.55

Also, why are Bucks Creek and Volta going as decisions rather than inform? It looks like they meet the withing 100% RSE for additional benefits.

Could we update the template like this:

Overall Miles Installed	4.73 Existing OH	4.73 OH	5.
-------------------------	------------------	---------	----

If not for today, that's fine, but maybe for the next time.

Spoke with Andy this morning, and he wants to prioritize the remaining projects we didn't get to yesterday for todays discussion. To that end, attached are draft materials for inclusion in today's meeting.

- 3 Mitigation specific approval(s) / inform(s)
- 3 RG projects for scoping

Please let me know if there are any edits required as soon as possible; we're trying to send a pre-read by 10am.

Thanks,

[REDACTED]
