Per our conversation today, please find attached the updated spreadsheets with summaries for both EVM and System Hardening (I added a summary box in each spreadsheet, in the second tab). The second and third tabs can be added to the Board materials.

Let me know if you have any questions,

Thanks,
[REDACTED]

I had an action item from today's meeting to identify all of the reports that are provided to the Board that include EVM and System Hardening information. In addition to the WMP report that [REDACTED] team produces, I have confirmed that there is some data that is included in the F&BH (Financial & Business Highlights). The F&BH is provided to the Board monthly through the Resource Dashboard. There are some parts that are confidential, so I'm just giving you a screenshot of the relevant pieces.

As we discussed, our first objective is to get a version of the report with a summary/ explanation up today. Phase 2 will be to coordinate this report with the F&BH and WMP reports also provided. Happy to help when we are ready for that discussion.

Thanks,
[REDACTED]

Ah- got it. Will let the Corp Secretary know to post.

Thank you!

Thank you for the follow-up [REDACTED]. No concerns but do suggest uploading the LTIP SH and EVM materials on Board Vantage as this was at [REDACTED]'s request from the Comp Committee.

Thank you for joining today's meeting (especially given your day with the governor's officer in the field).

For the Feb 9th meeting, we're looking to limit the formal materials as those would be eligible for a CPUC data request (under the WSD filing for executive comp). As we'd like to limit the scope for the exec comp review (and keep their operational questions focused in other forums), we'd like to not include the background material on the LTIP for the formal materials. Do you have any concerns with that approach?
