	Hardening and EVM Detailed Work Plan Lists
Am available post 4	pm
From: Sent: Eriday, Februar	ov 05, 2021 2:26 PM

and I would like to set up a time to speak with you about this report if possible before we put it up to the Board. There is a lot of data here and we are not sure how it will be interpreted without some context or a summary. We are also wondering if there is overlap with the monthly WSP report but up for the Board that also covers System Hardening and EVM. In addition, there are reports related to WMP that we have been asked to provide to the Board on a monthly basis. We would like to make sure the information we're providing in all of these reports is consistent. Please let us know your availability this afternoon or Monday. Thank you, From: Sent: Thursday, February 4, 2021 3:26 PM To: Cc: Subject: System Hardening and EVM Detailed Work Plan Lists Importance: High As part of the discussions that has had with the compensation committee of the board regarding the LTIP Metrics for System Hardening and Enhanced Vegetation Management, he had stated that we would provide monthly updates at a reasonably granular level Attached are the two spreadsheets that detail all the work in the pipeline to support reducing the most risk on the system These files would be informational only, but wanted to have them sent out with the pre-read. I will be meeting with him to make sure he is comfortable with everything in these files. For context. In 2021 LTIP System Hardening = 1.0 Target is = 200 Miles Team is getting 504 miles prepped to ensure we meet the target Enhanced Vegetation Management = 1.0 Target is 1890 Miles - The team has 1749 miles approved by the Wildfire Risk Governance Committee; more will get added over the next weeks.
