Yes. The Oro Fino's would be great to discuss. They don't have the agency issues that the team was looking for on this visit. That said it would be good for them to get their eyes on that work if time allowed.

[REDACTED] is getting back from vacation on Monday I think. We should call him to discuss the Oro Fino Circuits for the next slide deck. After talking with him I could mention it to [REDACTED] to note it in the agenda as optional if time allows either Monday afternoon or Tuesday Afternoon. They're supposed to be in Chico/Oroville on Tuesday.

Ok,

That is helpful background. Seems like there would be a good opportunity to evaluate Oro Fino as well to try to get it in the plan as we are somewhat close.

I love having [REDACTED] there. We will just have the negotiate [REDACTED] presence.

New risk model. In the plan. Pre-Engineering's are complete. 2022 work because it's mostly underground.

The are going to be in Paradise and Redding the days following our visit so [REDACTED] wanted something up in that area and they wanted to see a project with "Agency Challenges".

This is a little south east of Paradise. It has railroad, Caltrans, Forest Service and PG&E hydro that all have to be coordinated. Not to many project will have tougher agency challenges.

I swear I wasn't targeting [REDACTED], but he does happen to be the PM.

FYI.

After a discussion I had with [REDACTED] about the site visits, Bucks Creek was the best fit.

Hi [REDACTED]

Yes. We do want [REDACTED] team included on the April 12 visit.

[REDACTED]
We plan to visit the 3 Bucks Creek projects

Hello All!

FYI, the following is a high level snapshot of the April Site Visit agenda. No feedback yet.

I'll let you know when they've given the go ahead.

Thanks,

[REDACTED]

For your consideration is the proposed site visit high level overview. Please review and let me know of any changes or recommendations.

Monday, April 12th

0800 Start Time

AM and PM – System Hardening Project with Agencies

Three projects on the Bucks Creek circuit that cover 4 miles. They are high risk score on the new risk model. They have Railroad, Caltrans, Forest Service & PG&E Hydro to manage. These projects are also 90% underground which means they won't be built until 2022. The projects are south east of Paradise.

Do you want someone from [REDACTED] team to be included?

Tuesday, April 13th

PGE-DIXIE-NDCAL-000015800

0900 Start Time

AM – Distribution Inspect App Observation w/ Contract Inspectors

PM – Transmission Inspect App Observation

AM – [REDACTED] Distribution, Chico)

PM – [REDACTED] (Transmission, Oroville)

Wednesday, April 14th

0700 Start Time

AM/PM – Vegetation Management

Post wildfire mitigation and EVM work in Redding, CA.

All of these projects are in the North Valley Region. Logistically, Chico looks like the best central hub for all three days.

Thanks,
