Re: Notice of Intention to Install Underground Facility

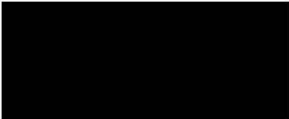

PG&E G-PM: 

Good morning 

Pacific Gas and Electric Company intends to install gas and electric facilities to serve a new 97-unit apartment complex at the subject location. The proposed installation is depicted on the attached Trench Layout sketch. Please indicate below whether your company wishes to install facilities in this trench no later than 9/17/2020.

Pacific Gas and Electric Company employs a standard trench configuration for joint trench installations. The "Joint Trench Configurations and Occupancy Guide" depicts the cross-sectional area of the trench allocated to each type of utility. If your company intends to install facilities in this trench, please check the appropriate box below and show on the attached Trench Layout sketch the portions of the trench your company intends to occupy, the cross-sectional area in each portion that your company will require to accommodate the conduits or other linear facilities it intends to install, and the approximate substructure locations your company will need.

Thank you,

Attachments: INTENT

My company intends to install facilities in this trench. The cross-sectional area of the trench required for conduits or other linear facilities is ___" wide by ___" high.

Engineering contact and Ph# _____

Construction contact and Ph# _____
