Attachments: Project List MAT 08W - Hard Pivot Review 110320 (003).xlsx

Thank you for calling me and clarifying. Based on our conversation here is what would work.

1. For Each EDRS – Create a folder with the EDRD number, scrape all the documents in that EDRS and place it in the folder.
2. The attached spreadsheet has ERDS numbers in the following columns – AN, AR, AY, AZ and BJ. It is the files from these EDRS's that need to be scaped.
3. Finally, put all the folders into one larger folder and send me the link

Thanks

A	AN	AR	AY	AZ	BJ

Sounds good. I have let the team know (cc'ed here) on this. They will be reviewing the column AZ in the excel document that has the link to EDRS and pull all documents in that EDRS request.

[REDACTED] – Please send out a link to the team here once you have pulled the documents.

Thanks

Some of the measures included in this document are contemplated as additional precautionary measures intended to further reduce the risk of future ignitions following the 2017 and 2018 wildfires.

[REDACTED]

Yes, if they can scrape the documents for each of the 27 EDRS's that would be very helpful. Ideally each project is in its own folder – Named After Its – Order #
Can they send me a link to the overall folder

[REDACTED] – We have the EDRS team ready to scrape the documents. If this still needed, who can they work with to pull the documents? Let me know.

Thanks

[REDACTED] – Do you need the EDRS team to pull in the attachments at the backend then?

Thanks

Let me find out and get back. In EDRS you can search based on Order number (associated with the project) individually and pull the documents for that order. I take it that you are looking for a query in EDRS to pull all the documents related to the 27 orders numbers – correct?

Thanks

Is there someone in IT that can do a scrape of all the documents in EDRS that tie to these 27 Projects.

We are creating slides from each of those documents for a high level discussion with leadership – but it is sensitive as both the Federal Monitor and the Operational Observer are at the meeting.

I need to get it over to the KPMG team that is helping us pull all the material together.

The project list of 27 in construction projects is attached. Column AZ has the business case documents in EDRS. Let me know if you can't open those, and we'll figure something out.

What you've outlined below is fine, thanks for your help.

H [REDACTED]

I wanted to follow up with you on the in-construction profiles for this Wednesday. I know the team wanted to do a project by project review for that bucket of work, and I wanted to follow up on that status of those profiles. From the WFRG meeting last Friday, we had an initial template set up that used the Advanced Authorization data and what was produced by [REDACTED] model. Where you planning on using this template for the meeting this week, or was there another format that you had planned to use?

Additionally, my team would be happy to provide assistance with pulling these profiles together if your team needs it. We would need:

- The Advanced Authorization
- Image of the planned work
- Any detailed estimates for cost
- Full list of projects

Happy to hop on the phone to discuss this as I know there is a quick turnaround on profiles.

Thank you
