████ is supporting the EOC on night shift, but I spoke with him last night, and we should be on track for Thursday. Hopefully, tonight will be his last night shift.

The attached shows the

Subject: System Hardening Check-in

Hey ████

I wanted to touch base ahead of the project review on Thursday to see if there is are any known roadblocks to getting the materials ready? If so, how our team can plug in to help out?

Separately, wondering if you have some later in the day to connect with ████ and myself on project level tracking. ████████ has requested monthly updates on where the project pipeline is (relative to the 2021 LTIP targets), which we'll assist in developing. Let me know when you have availability over the coming days and I'll set something up.

Thanks,

████████████████████
