Hi [REDACTED]

PM 35212441 has 'scope overlap' with my project, 35217268. What is the process to ensure that the two projects scopes come into alignment? [REDACTED] was the scoping ADE for my project and appears to be the ADE on the Sub project as well....should he confirm scope is in alignment? [REDACTED] is the new ADE assigned to my project.

Please advise as to what the process is to ensure that we have scope alignment considering PM 35212441 appears to be nearly ready to break ground.

Please advise,

[REDACTED]

Hi [REDACTED]

Attached are the most recent CMCS and construction drawing for PM 35212441, the job to rearrange facilities at the Bucks Creek substation. SAP shows a construction start date of 02/16/2021 and construction end date of 07/06/2022.

Thank you for your time,
