Subject: System Hardening Potential Projects w/DSDD Triggers

Attachments: 2021-3-08_System Hardening Basemaps.xlsx

Hi ████ ,

I had ██████ go through all of our current Basemaps to scope for any DSDD Triggers; if you sort Colum I you will see her results. Keep in mind, this is based on the current SOW detail provided, which in some circumstances still isn't quite nailed down.

You'll see that 3 Mariposa projects are designated **TBD**; this is because ████████ is working with the Estimator for possible solutions to avoid going down the DSDD path. I'll schedule time with her, the Estimator, ████ and myself to go over these projects.

Feel free to call me this week when you come up for air. Thanks, ████
