Subject: New DOT Report Request - Grid Design Project List

Attachments: Copy of Exec Status Update 08W - 3.24.21(DOT integration ver).xlsx

Hi [Redacted]

I have another request for a DOT Report to be added to our WSHP section of DOT.

Attached is a template of what we would like to add to the DOT and the various columns have been labeled based on whether it is a data pull from external sources or a user input column. Hopefully there is enough notation within the file to get you going.

I've also set a quick meeting for Monday just to ensure what I'm sending contains enough information to proceed and if not it will give us an opportunity to discuss any possible road blocks as well.

Thank you kindly for your support,
