I would suggest we meet at 400 E. Park Avenue, Chico, 95928 on Friday 4/16. We can car pool from there.

Let me know if you disagree

Hi [REDACTED]

I looked it up, and it's now called Toni's Mix'n It Up Restaurant. Address is 11975 CA-70, Oroville, CA 95965. Do you think there will be an issue if we leave a couple of rigs parked there?

Thanks,

Last cell service and location to meet would be across from Jarbo Gap CAL Fire Station on highway 70. The restaurant used to be called Scooters and has a large parking lot and cell service. Once we drop below that location, we lose cell until we get down near Bucks and you have to have a booster. Each PG&E facility usually has wifi at their location also and there are three to four hydro facilities along the way depending final route.

No problem.

If we go with Bucks Creek we will need to be clear on the logistics. It's well out of cell range so I'll find a meeting location within cell range that we can all head out from together.

Perfect!

Working on a more detailed schedule now. Haven't received the official blessing from [REDACTED] and [REDACTED]

Hi [REDACTED]

Yes. We do want [REDACTED] team included on the April 12 visit.

[REDACTED]

We plan to visit the 3 Bucks Creek projects

- 35217268
- 35224712
- 35224713

Hello All!

FYI, the following is a high level snapshot of the April Site Visit agenda. No feedback yet.

I'll let you know when they've given the go ahead.

Thanks,

[REDACTED]

For your consideration is the proposed site visit high level overview. Please review and let me know of any changes or recommendations.

Monday, April 12th
0800 Start Time
AM and PM – System Hardening Project with Agencies

Three projects on the Bucks Creek circuit that cover 4 miles. They are high risk score on the new risk model. They have Railroad, Caltrans, Forest Service & PG&E Hydro to manage. These projects are also 90% underground which means they won't be built until 2022. The projects are south east of Paradise.

Do you want someone from [REDACTED] team to be included?

Tuesday, April 13th

0900 Start Time

AM – Distribution Inspect App Observation w/ Contract Inspectors

PM – Transmission Inspect App Observation

AM – [REDACTED] (Distribution, Chico)

PM – [REDACTED] (Transmission, Oroville)

Wednesday, April 14th

0700 Start Time

AM/PM – Vegetation Management

Post wildfire mitigation and EVM work in Redding, CA.

All of these projects are in the North Valley Region. Logistically, Chico looks like the best central hub for all three days.

Thanks,
