Hi [REDACTED]

It is looking like this project is on MHRD. Do you need me to drive up to Rock Creek on Friday or do you have the people you need available?

Thanks, [REDACTED]

Subject: RE: Executive System Hardening Project Walkdown - Plumas National Forest - Bucks Creek 1101

Hey Again 😊

I know that [REDACTED] reached out to a couple of individuals on this email chain, but I just wanted to circle back with the entire team on the game plan for Friday.

PG&E will meet up with most of the group at 8am this Friday at the Starbucks parking lot in Chico.

- o Location: 2485 Notre Dame Blvd 750, Chico, CA 95928
<https://goo.gl/maps/35kmFomzCpfqbNvY7>

Plumas National Forest and the Railroad will meet up with the PG&E group at the Rock Creek Power House at 9am.

PG&E will have a safety tailboard, condense vehicles as much as possible in Chico then drive to the Rock Creek Power House, approximately 45 minutes away to meet with the rest of the team. There is no cell reception there so if there are any changes to this plan we will need to be coordinated a day prior.

The intent of the visit is to have open and professional discussions on how all parties involved on System Hardening projects can collaborate to meet everyone's needs and expectations.

The group is expected to consist of;

- 3 executive leaders from PG&E
- 3 Project Management representatives from PG&E
- 1 Asset Management representative from PG&E
- 2 Public Safety Specialists from PG&E
- 2 Representatives from Filsinger Energy Partners
- 1 Representative from the CPUC's Wildfire Safety Division
- 1 Representative from Caltrans
- 1 Representative from Cal Fire
- 2 – 3 Representatives from Plumas National Forest
- 1 Representative from the Rail Road

Also, please find below PG&E's Covid Safety Protocols for this meeting:

The Centers for Disease Control and Prevention (CDC) now recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain, and especially in areas of significant community-based transmission. To align with this direction, PG&E is now requiring employees and non-employee workers who must leave their home to work during the COVID-19 pandemic to wear face coverings when:

- *In contact with customer, while continuing to maintain at least a six-foot distance per social distancing guidelines;*
- *Working on a job site in the field; or*
- *Working at a PG&E Facility in the vicinity of other people.*

PG&E personnel may use their own face covering or a face covering provided by the company. Face coverings that are open at the bottom, such as bandanas, should not be used as they are less effective both in preventing the release of virus to others and in protecting the wearer. Your face covering should achieve a reasonably good seal all the way around against your face, so that air does not enter or exit around the mask. You may have to try different masks to find one that fits well for you. For those who have difficulty achieving a good seal, using a mask with straps that wrap around the head, instead of just the ears, may be helpful. Beards may also interfere with achieving a good seal and it is recommended that those with beards make sure there are no gaps and the mask is hugging your skin.

Finally, please let me know if you have any questions 😊

Thanks!

Hey [REDACTED]

Ah that totally makes sense. This location is where PG&E is proposing to meet everyone for a centralized location and then drive up to the site along Hwy 70. I will reach out to [REDACTED] and see where the teams first stop is going to be. That way your team can just meet along Hwy 70 at the project site 😊

More to come.

Thanks!

Hey [REDACTED]

I am a little confused. Is that where the PG&E people are meeting to travel up Highway 70 to the project area? Half of the people on our list live in Quincy and traveling down to Chico to travel back up two thirds of the way home would be counterproductive. If that is just where your people are meeting to depart from, we can figure out a place and time for whomever from the Plumas to meet you nearby the actual site.

Thanks [REDACTED]

Good Morning and Happy Friday!

Ok , so I have confirmation on time and location for Friday's site visit.

- Date: Friday, April 16th
- Time: 8am
- Location: Starbucks in Chico.
 - Address: 2485 Notre Dame Blvd 750, Chico, CA 95928

[REDACTED] will be there at least by 7:30 with a vest and hard hat on in order to be easily identified. Here is [REDACTED] phone number just in case: 916-591-5139

Please let me know if you have any questions. Thank you all so much for your time and effort on this. I truly appreciate it!

Hey Team!

I am working on getting the details for the meeting time and location. The PG&E team had a call this afternoon and should be updating me with all the specifics later this evening.

Thanks!

Hi [redacted]

PG&E is trying to set up a site visit for next Friday, April 16 where PG&E Executives may be in attendance. They have requested that the Plumas NF attend this job walk. The location is along Hwy 70 nearby Merlin, Rock Creek, and Storrie. The project regards: *system hardening project where we will be replacing poles and conductor. We will also be installing larger crossarms and potentially having interest poles.*

[redacted] is on A/L this week and so PG&E has been communicating with me. I have attached a pdf map. Is this all on MHRD or is there some FRRD involvement? I could make the trip up, but it looks much closer to Quincy. Anyway, we should arrange for at least one person from the Forest Service to join PG&E for this site visit.

Thanks, [redacted]

Good Morning [REDACTED]

I apologize for the delay. As of right now this project is in the preliminary design phase and you can find the rough KMZ file attached. I am working with our team to get you a meeting time and location. The meeting will be Friday April 16th sometime in the morning but I will get you more details this afternoon.

Please let me know if you have any questions at the moment or if you would like me to set up a meeting.

Thanks!

Importance: High

Hi [REDACTED]

I hope all is well.

We have a proposed System Hardening project that may involve the Plumas National Forest. We do not have a full scope of the project at this time; however, it is a system hardening project where we will be replacing poles and conductor. We will also be installing larger crossarms and potentially having interest poles. Please find the KMZ attached. We are attempting to organize a field meet where PG&E Executives may be in attendance. They have requested that the Plumas NF attend this job walk. The job walk is scheduled for next Thursday or Friday. I was hoping that one of you could attend the walkdown or send a Forest representative. Is that doable? If yes, what day works best for the Forest?

Thank you!
