Hi [REDACTED]

The 5/27 date is being driven by the expected release date of the ERTC...which to my knowledge is still on track. Regardless, the date is still very aggressive so I would hold off on sending letters until I have a contractor onboard for the work.

Respectfully,
[REDACTED]

Hi [REDACTED]

Are we still on track for Wyandotte 1109? Just want to double check before I mail letters.

Thank you!

Okay, before I actually send out any customer notifications I will check back with you to double check.

And yes, Redding area would be me as well. I cover the whole North valley area. [REDACTED] please reach out if you need anything from me. I have not seen any Oregon Trail system hardening come across in my project tracker, but I don't always get them in the early stages. Keep me updated and happy to help.

Thanks

Hi [REDACTED],

Its all OH in place....and that date is pretty aggressive but still possible.

On another note....do you cover the Oregon Trail circuit? [REDACTED] Cc'd on this email is the PM on those projects and is wondering who his LCE will be?

Please advise,

Hi [REDACTED],

Just wanted to double check on the start date for the Wyandotte job below. Are you still looking at 5/27? Just want to make sure I get out customer communications. Any customer concerns from the project team at this point? This particular phase is all overhead correct?

Thank you

Hi [REDACTED]

Of the projects in your list below these are the only ones I feel that we can build this year....2021:

Order	Job Owner Name	Project Reporting Year	Order Description	SAP Status
35057018	[REDACTED]	2021	CWSP - EL DORADO 2101 - 19752 - PH 4.1	PEND
35226627	[REDACTED]	2021	CWSP - KESWICK 1101 LR 1586 PH 1.2	ESTS
35219260	[REDACTED]	2021	CWSP - WYANDOTTE 110932586 PH 1.1	PEND
35226630	[REDACTED]	2021	CWSP - KESWICK 1101 LR 1586 PH 1.5	ESTS
35226631	[REDACTED]	2021	CWSP - KESWICK 1101 LR 1586 PH 1.6	ADER

The 'Ready to Break Ground' dates are a loose goal that I will tighten up or push out as I clear 'dependencies'. PM 35219260 is near tribal property and may need your assistance sooner than any of the others....see attached email.

The balance of the projects in your list have been moved to 2022 since the scope is moving the OH system UG, regardless, as you can see in the attached email we are getting the public's attention when have marks placed in the streets showing any existing utilities...this is part of our 'base-map' process or surveying that we are doing in preparation for the placement of our new trench and other appurtenances....boxes, transformers... etc.

Feel free to call me any time to discuss in more detail.

Respectfully,

Hi [REDACTED]

I have only worked with you while backfilling for [REDACTED], however, it now looks like you may have some system hardening work in the North Valley now. Below are the projects I was just made aware of. I am looking to get any updates you may have. If they have 2022 start dates, just let me know and I will push. Looks like I was given start dates in May for the Bucks Creek jobs. Let me know.

And of course, if anything on the customer side comes up for these, do not hesitate to reach out. If you have any calls for these please include me.

Thank you!
