Attachments: System Hardening Daily Summary 06/22/21

Hey [REDACTED]

The data from the "Rainbow Report" or the "Daily WSHP Summary" is accessible via the "summary data" tab within the file.

To isolate the NCF fire rebuild order list ensure that all filters are cleared within the table. Then follow the steps below.

1. Column U "Program" Filter by "FRRB-NCF"
2. Column BM "Workplan Status" Filter by "KEEP"
3. In Columns I and K labeled "UG" and "OH" respectively you will find the breakdown between underground and overhead mileage associated with each order

Note that the report does not roll up to the "Planning Order" level thus you will need convert to PM orders to get what you need in your question below. Furthermore the "Summary data" tab is a direct pull from a DOT report labeled "WSHP Project Log".

This data is readily available for analytics within the DOT and can also be pulled from EDS SQL servers if needed.

Hope that helps.

Regards,

I can add you to the daily distribution list moving forward. However the request on breaking out the underground from overhead is something which [REDACTED] can answer.

Thank you,

[REDACTED] | Project Controls Analyst

[REDACTED]

We are setting up a weekly project dashboard that uses information from the report you send to [REDACTED] daily. Would it be possible to add my email to the distribution for a period as we proceduralize the updating process. I'd be very appreciative.

Note the request to break out underground (Planning Order 5795419), overhead (Planning Order 5793918) and Short Mains (Planning Order 5796539)?

Thanks,

The rainbow report gets sent to me from [REDACTED] on a daily basis. I do not save them as I really do not use them. This would represent the most up to date mileage installed, energized and QC'd.

- Do you report anywhere the weekly incremental progress and do you have targets for weekly / monthly reporting? **I do not send any report outs. We discuss the estimating tasks on our weekly estimating call. The goal as previously set up was 10 mile out of estimating monthly**
- Is it possible to break out the underground from the overhead work? I understand that at this point, there is no Overhead progress? **This is a question you would have to ask [REDACTED] or [REDACTED] as they created the rainbow report.**

Thank You,

[REDACTED]

Thanks, [REDACTED].

A couple of questions for both of you:

- Do you report anywhere the weekly incremental progress and do you have targets for weekly / monthly reporting?

- Is it possible to break out the underground from the overhead work? I understand that at this point, there is no Overhead progress?

██████████ is there a location where you store the iterations of the file with the “Rainbow” chart? At this point, it appears to be the best source of 08W construction information. If not, is the current progress of 5.6 miles constructed the most up to date for this week’s report (cut off 6/18/21)?

Good morning ██████████

Everything that is Miles Constructed, CONS, UNSC and Pend have been estimated.

Those in ESTS are in Progress and the UNSE are ones we are just getting assigned.

Status Group	2021 Forecast (Mil)	
	Fire Rebuild - NCF (08W)	
	GC	Contract
Miles Constructed	0.8	4.8
Miles in Construction Progress (CONS)	5.5	0.5
Ready for Construction (UNSC)	-	5.6
Dependency (PEND)	1.7	36.4
Estimating (ESTS)	3.7	12.2
Unscheduled Estimating (UNSE)	Scoped	14.7
	In Scoping	1.5
	Pre-Scoping	-
TOTAL		87.4

██████████
Central Design Manager North

Some of the measures included in this email are contemplated as additional precautionary measures intended to further reduce the risk of wildfires.

The chart below shows how many miles are I the current status. We do not have a regular report that automatically shows what was completed the previous week / month. I manually provide that information to my team on our estimating calls.

Thank You,

Thanks, [REDACTED]

My interpretation is that 15.9 total 08W miles have been estimated – is that correct? Is it possible to obtain figures for Underground and Overhead, and also weekly progress?

[REDACTED]

		2021 Forecast (Mil)	
		Fire Rebuild - NCF (08W)

Subject: North Complex Estimating

Hi, [REDACTED]

We met with [REDACTED] to coordinate dashboard reporting for the North Complex fire. She indicated that estimating is close to complete for the O8W work, and that you have a report that you maintain based on the AO download from SAP. Could you send that report to us for our use in the Estimating section of the dashboard and perhaps in other reporting efforts such as the CRRP Tableau dashboard.

Thanks again for your help,

[REDACTED]
