Good evening Gents, tomorrow morning we need someone to go to Cresta Dam first thing to check the propane level. We are on the propane generator there since this morning. Power is not coming back because they just took the 1101 out of service due a fire near Cresta Dam. Also, we need one of you at Lower Bucks (Grizzly Intake) for EAP testing at 1200. And tomorrow we're supposed to bring Bucks Creek Unit #1 online at 1200 to sell spinning reserve. The unit should be able to start remotely, but you never know. It would be nice to have one of you close by.
