FYI

Dixie Fire Talking Points, Updated 1400 July 14, 2021

- The safety of our customers and communities is PG&E primary responsibility.
- PG&E continues to monitor the Dixie Fire in Butte and Plumas counties, and we have crews on-site to support first-responders.
- Late this morning several transmission lines lost power from the Dixie Fire's smoke. Approximately 10,000 PGE customers in Plumas County lost power. We restored power to all customers by 2 p.m.
- The fire is near the footprint of the Camp Fire.

If asked:

- **Did PG&E assets start the fire?** Please check with Cal Fire. We don't have access to the site as it's an active fire.
- **Did you have outages in that area close to when the fire started?** We don't have access to the site as it's an active fire.
- **Is this fire in or near the footprint of the Camp Fire?** Yes, it's in the Feather River Canyon in Butte County.

Background:

- At 9:30 a.m., Cal Fire's Butte Unit Tweeted that: "Fire is 1200 acres, burning to the north away from populated areas. Large resource orders are happening."
- Cal Fire's web page describes the Dixie Fire as being located above the Cresta Dam in the Feather River Canyon in Butte County.
- Here is the Cal Fire link to Dixie Fire info: <https://www.fire.ca.gov/incidents/2021/7/14/dixie-fire/>

Our noon talking points. On the next round I'll develop something specific to the 50,000 question.

- The safety of our customers and communities is PG&E primary responsibility.
- PG&E continues to monitor the Dixie Fire, and we have crews on-site to support first-responders.
- Firefighters requested a distribution line be de-energized last night for firefighter safety.
- Several transmission lines are now de-energized. As of 11:30 a.m., approximately 10,000 PGE customers in Plumas County are without power. We are investigating restoration options.
- It's near the footprint of the Camp Fire.
