At 1335, Dixie Air Attack states the fire is approximately 1100 acres in size, pushing in a north/northeasterly direction with spotting occurring up to 1/4 mile ahead of the main fire. The fire has progressed west and north underneath the Caribou-Table MTN 230kV asset up on top of the ridge. CAL FIRE states the fire has spotted over the U Line Road to the north which is where firefighters were hoping to slow the northern progression of the fire. The fire will continue to burn away from the community of Concow, and PSS [REDACTED] is working with Dixie IC on an updated perimeter map where I'll try to push out an updated PG&E asset map showing the fire's progression in a few hours.
