Just an update I am back at Table . [REDACTED] is at the IC and will relay if cal fire needs anything de energized. Cal fire hand crews are starting to report movement and real location of the fire. I heard on their radio that "the fire was aggressive toward the high tension line" . [REDACTED] has been working , preliminarily, to island Caribou. I will keep checking with [REDACTED] hourly and let you know if anything big happens. Enjoy your training
