AFF but we are broadcasting ADS-B

A screenshot of a mobile application interface for a waypoint named "FIRE714A". At the top is a satellite map view with a label "FIRE714A" and a road marker "70". Below the map is a dark blue header with "Close", "FIRE714A", and "Edit" buttons. Underneath are four action buttons: "Direct To", "Add to Route", "Hold...", and "Wx Forecast". A section titled "USER WAYPOINT INFORMATION" contains a table with the following data:

USER WAYPOINT INFORMATION	
Name	FIRE714A
LOCATION INFORMATION	
Mag Var	14°E
Location	39°52.56'N/121°22.73'W
Bearing To	10.3 nm at 14°M

This is the coordinate that air attack just gave me. TFR is going to 10 mile radius. Air attack authorised us in to the TFR to 5 miles from that coordinate
