Subject: RE: corrected story in Plumas News Group

Thanks for hunting this down and resolving it for us!

Great investigative work....

Subject: corrected story in Plumas News Group

[REDACTED]

Below is the Plumas News Group's corrected online story. The original story stated that the transmission lines were turned off at the request of firefighters, and the editor has corrected that.

In our latest set of TPs, we no longer reference the three customers who are without power due to Tuesday night's request by firefighters to de-energize the distribution line. This should eliminate any further confusion.

UPDATE: PG&E restores all power that was lost due to Dixie Fire

July 14, 2021

UPDATE: 2:16 p.m.: PG&E is reporting that all power has been restored.

UPDATE 2:09 p.m.: PG&E has restored all about 1,550 of the more than 10,000 customers who lost power between 11 and 11:30 am.

Also PG&E did not de-energize the transmission line today at the request of firefighters. The transmission lines went out due to the fire. Last night, PG&E did de-energize a distribution line at firefighter's request, but that wasn't transmission lines and only three customers are out on that distribution line

As of 11:30 a.m. approximately 10,000 PGE customers in Plumas County were without power. PSREC was also affected, but has switched to alternate power and restored electricity to its South customers.

PGE-DIXIE-NDCAL-000018592

PG&E continues to monitor the Dixie Fire, with crews on-site to support first-responders. PG&E is investigating options to restore power. The last update mentioned 2:15.
