waterforwildlifeca "The #DixieFire is taking off in the Feather River Canyon, across the River from Grizzly Dome. This is north of the area burned in 2018 Camp Fire.

This image shows the fire at 2am, 7/14/2021. Dark blue is Camp Fire, light blue burned in 2008.

Thanks [REDACTED] Once you talk to the PSS, let's share some very high-level TPs with this group to review.

I'm waiting for a call back from the local PSS who is in a briefing. Fire now 500 acres with zero containment. Three customers are without power (one [REDACTED] for lights at short tunnel, another the [REDACTED]).

I'm not seeing any HAWC or ET reports about any threat to trans lines but yes, this area has a few trans lines running up the Feather River Canyon.
