Hi Lovelytics and PG&E team,

I am tracking a recent incident (dixie fire) and do not see recent detects in the public page:
https://pgefdp.lovelytics.info/pge_fire_app/#. Last I see are from 12:26 pm. Our internal page has the most recent detections.

Please check this out. I'm not sure if this is a data transfer issue from PG&E to lovelytics or a ingest/plotting issue.

Thanks
