Hi, [REDACTED]
I have an update and a request.
We have restored all about 1550 of the more than 10,000 customers who lost power between 11 and 11:30 am. This morning.

Please note, we DID NOT de-energize the transmission line today at the request of firefighters. The transmission lines went out due to the fire. Last night, we did de-energize a distribution line at firefighter's request, but that wasn't transmission lines and only 3 customers are out on that distribution line.

Can you please fix that?

Thank you,

PG&E Addresses Power Outage Due to Dixie Fire

Plumas News, July 14, 2021

<https://www.plumasnews.com/pge-addresses-power-outage-due-to-dixie-fire/>

Paul Moreno, spokesman for PG&E, said that the crews de-energized transmission lines this morning at the request of firefighters. As of 11:30 a.m. approximately 10,000 PGE customers in Plumas County were without

power. PSREC was also affected, but has switched to alternate power and restored electricity to its South customers.

PG&E continues to monitor the Dixie Fire, with crews on-site to support first-responders. PG&E is investigating options to restore power. The last update mentioned 2:15.

More to follow:

The safety of our customers and communities is PG&E primary responsibility. PG&E continues to monitor the Dixie Fire, and we have crews on-site to support first-responders. Firefighters requested a distribution line be de-energized last night for firefighter safety. Several transmission lines are now de-energized. As of 11:30 a.m., approximately 10,000 PGE customers in Plumas County are without power. We are investigating restoration options. It's near the footprint of the Camp Fire.
