We are down to about 1,600 without power in Plumas County. Does this not work: www.pge.com/outage ?
There's a map you can view on it.

████████,

Yes. More than 10,000 customers. More to follow:

The safety of our customers and communities is PG&E primary responsibility.
PG&E continues the monitor the Dixie Fire, and we have crews on-site to support first-responders.
Firefighters requested a distribution line be de-energized last night for firefighter safety.
Several transmission lines are now de-energized. As of 11:30 a.m., approximately 10,000 PGE customers in Plumas County are without power. We are investigating restoration options.
It's near the footprint of the Camp Fire.

Hey ████
I hear that due to the Dixie Power some PG&E customers are without power? Is that true? If so how many customers are impacted?

Thank you,

███████████
