The HAWC does not conduct investigations.

Ell team conducts the investigations and we share info with them on a regular basis. When we become aware of a fire with an associated outage, we notify that team. We reference ILIS to gather information frequently.

*Copying Ell team for awareness.

Thanks for the information!

I understand that the HAWC now conducts fire investigations and I'm not sure if this would be information you would want?

Yesterday, T-Man reported to the NDCC that there were multiple non-PG&E construction crews working in the area of the bridge and tunnel near the trouble area on the Bucks Creek 1101. I'm not sure if there is any relation to the trouble location, but if you need to speak with reported to the trouble location, but if you need to speak with reported to the trouble location.
