[REDACTED]
Yes. More than 10,000 customers. More to follow:

The safety of our customers and communities is PG&E primary responsibility. PG&E continues to monitor the Dixie Fire, and we have crews on-site to support first-responders. Firefighters requested a distribution line be de-energized last night for firefighter safety. Several transmission lines are now de-energized. As of 11:30 a.m., approximately 10,000 PGE customers in Plumas County are without power. We are investigating restoration options. It's near the footprint of the Camp Fire.

Hey [REDACTED]
I hear that due to the Dixie Power some PG&E customers are without power? Is that true? If so how many customers are impacted?

Thank you,
