Dixie Fire

More to follow:

The safety of our customers and communities is PG&E primary responsibility.

PG&E continues to monitor the Dixie Fire, and we have crews on-site to support first-responders.

Firefighters requested a distribution line be de-energized last night for firefighter safety.

Several transmission lines are now de-energized. As of 11:30 a.m., approximately 10,000 PGE customers in Plumas County are without power. We are investigating restoration options.

It's near the footprint of the Camp Fire.
