Team,  
This information is sent proactively to ensure **as leaders** we are aware of emerging conditions in Butte County and in support safety of our coworkers. Based on recent wildfire activity seen today at this link you will find a [Wildfire Response Safety](#) connection for use proactively.

Also attached are links to information involving an active fire in our North Valley area identified as the Dixie Fire in Butte County, *please ensure we make contact with our teams in the general area and local Division.* Let's also initiate actions to support any needed stop work actions, proactively or by order involving at risk conditions & support local OEC or other emergency response actions. There are many local actions being supported by our external partners as they respond and support. We also have active outage conditions in this area involving both T&D asset levels. Current service interruptions can be seen at this [link](#).

Lastly, we all have the responsibility to support conversations that do not **speculate on the situation** and support fact based conversations as required. We also need to be mindful of social media interaction as employees of PG&E, allow proper Corp Communications lead any media inquiries and adhere to any potential evidence collection responsibilities. At this time it is incredibly important that our **leadership actions** support the safety of our coworkers and communities we serve, let's make sure we work together and display discipline in our approaches, thank you for all you do!

- [Alert Wildfire](#)
- [Cal Fire Incident \(Dixie Fire\)](#)

Thanks,

Your Wildfire Leadership Team
