Subject: Dixie Fire IR from this am with PGE assets

On the north part of this map is a creek named Cedar Creek, just beyond the T-Line. The fire has progressed north to that point and is spotting.

We are prepping and treating hydro and Distribution assets at the fire's bottom today. Will engage in the distribution assets at Flea Mountain south this afternoon and tomorrow.

Currently committed:

Sup-2
E212
E213
E251
E252

Adequate resources for now

I am predicting a good down canyon progression of the fire tonight

So far the Caribou-Table T-Line has phased and is off line. We have talked the IC into leaving the CrestaRio Oso T-line live to minimize major grid impacts.
