Subject: Cal Fire request

I just got a call from PSS [REDACTED]. So Cal Fire got a call from the Gov's office asking why Cal Fire requested we turn off power to Plumas County! Of course, we didn't say that, but maybe a media mixed a story up.

I'm going to revamp the TPs about the distribution lines being de-energized Tuesday for firefighter safety and try to provide more detail and make it clearer the trans lines and Plumas customers lost power due to the Dixie Fire. [REDACTED] said he was told the info is on our website but I know we didn't post anything like that, but I'll check the outage map and our twitter account to be sure.

Subject: FYI: Twitter: BrandonRittiman -- Dixie Fire and PG&E mention

BrandonRittiman: NOW: NASA fire satellite shows new 400+ acre #DixieFire burning a along the same PG&E power corridor that sparked the 2018 Camp Fire.

This fire is slightly uphill from the origin point of that fire, which destroyed Paradise and killed 85+ people.
