That sounds good. By the way, tomorrow I'll let you know more about the parklet issue in SF Division, but we're thinking this could cause many similar problems across our service area. I'm happy to be the comms lead for the parklet situation since this will require a coordinated systemwide approach. Concerns are access issues and catastrophic underground equipment failure that could result in injury to people at a parklet on our facilities, among other safety issues.

Subject: July Heat Wave Flex Capacity Event PIO Hot Wash // Cancelled for today

All – Sorry for the abrupt notice but the EOC will be activating for the Dixie Fire at 1500 so I'm going to cancel

this for today, and try to look for a slot if things are calmer tomorrow or Friday.

Thanks, [REDACTED]
